**Design for life**

# Design for life

## The unmistakable quality of moll

With unique desk and workplace designs, moll has pursued the same goal for decades: developing a system that accompanies its user throughout life. Quality, durability, adjustability, comfort and ease of use are the focus here. The greatest challenge is in creating a form that lasts throughout the years and changes with the preferences of the user.

moll unique: Design for life.

# A complete world for work and life

**Desk, chair and light designed as one**

For an optimal work environment, moll has developed more than just a piece of furniture, but an entire system. At the center are the individual needs of the user. The moll T7 is the only desk that covers the entire adjustment range to allow use in all phases of life and work.

With the moll T7, the desk and light form a single unit. This always assures that the user can study and work with high concentration and minimum fatigue.

For people over 6 feet, the range of height adjustment can be extended with an additional 4-inch adapter.

# Growing for a lifetime

**The desk that meets the highest standards**

There is no such thing as a perfect ergonomic posture. But there is a perfect desk for every activity and its specific demands. The moll T7 does it all supremely well. Its user-friendly operation and versatility allow optimal adaptation to every situation.

The moll T7's drawer has a push-to-open function and offers room for everything that is needed for the desk, but not always needed on the desk.

Refined to the very detail: The optional cable duct with power management provides a place for power adapters and keeps the workplace neat.

# It's a question of adjustment

## Ergonomics starts with the chair

Optimal configuration of the desk chair is the basis for ergonomic seating. The moll S6 offers every function the user needs to adjust it to individual body mass and proportions: from the seating height to the seating depth to a separately adjustable backrest height. The six-armed star base and the braked castors ensure comfort and maximum safety.

Whether with or without an added cushion, the moll S6 employs the highest-quality materials together with the best crafts-manship.

To ensure that its ergonomic capabilities are used properly, the moll S6 is designed to be easy to work.

## Attractive form and function

Uncompromising design to the very detail

moll systems fit easily into sophisticatedly designed work and living environments. Its minimalist interplay of surface and color gives it lightness and clarity. Combination with the moll S6 chair and the moll C7 container results in distinctively unified form and function. User-friendly, ergonomic and beautiful.

The moll C7 container extends the moll T7 with drawers and a lockable supplies compartment. The face of the containers is adapted to the desk they go with.

The pad makes it easy to transform the moll C7 container into another place to sit. Its cover comes in the same fabrics available for the moll S6.

# The perfect work environment

For long-lasting comfortable seating

The actively breathing mesh of the moll S6 desk chair adapts flexibly to all body proportions and ensures lightness and a modern aura for the ideal desk environment. The optional upholstery provides long-lasting seating comfort. The selection of premium fabrics meets users' highest expectations.

Comfort, softness and color accents: The optional cushions come in a large selection of fabrics.

Mix and match chair cushions: The moll S6's cushions are also available individually. This makes it possible to combine mesh and cushion.

# Always rising to the occasion

## A desk with class

The moll T7 cuts an attractive figure for every phase of work, home and life. Its range of heights makes it not only a traditional desk, but also a counter for quick notes in passing or for standing work. It finds a place in any work environment and stands sturdily in the midst of life.

The moll T7 reaches the highest heights, but also excels its lowest heights. Its electric-powered height adjustment easily adapts the desk to its users at any time.

The moll T7 is made with safety in mind. Its height adjustment is a two-handed operation and can be locked. The motor stops immediately if there is resistance.

# A desk that lasts

## Timeless design and character

The moll T7 brings together comfort, ergonomics and timelessly beautiful design like no other desk. Interchangeable color inlays and container faces give moll products maximum versatility. This lets the desk's character be adapted at any time to current color trends and personal preferences. The uncompromising quality ensures lasting satisfaction — for a lifetime.

The moll T7 effortlessly integrates into any environment, yet remains striking. This makes it the ideal desk for every phase of life.

Whether warm and homey or cool and businesslike, the moll T7 is impressive for its concentration on the essential.

# For anyone on the move

No matter where

The moll T7 is not only flexible when it comes to height — it also offers the greatest possible mobility. It offers the right solution for any task. For concentrated work or reading and for creative activities, whether alone or for spontaneous collaboration. The castors integrated into the foot skirts and the height compensation function make the moll T7 great for use anywhere.

Endless possibilities in one place: The moll T7 creates an ideal work environment no matter where it is used or for what purpose.

Its electric-powered height adjustment doesn't just allow a quick change of posture, but also ensures that the moll T7 is suitable for a wide range of tasks.

# The history of good design

## Outstanding quality is no accident

When competencies come together, something good happens. moll is the inventor of the desk that grows with the user and is the leading expert in designing workplaces that span the age groups. At the same time, in addition to technical and ergonomic knowledge, moll is outstandingly competent at product design. They create desks, chairs, containers and lamps in which design, function safety and sustainability merge into one.

The moll T7 is a synthesis of function, technology and form. The result is a desk like none before it — a lifelong solution that delivers satisfaction for a lifetime. The moll T7 combines character with variability. It integrates effortlessly into any space while still retaining its originality. Clear lines, reduction to the essential, balanced colors and a design language of the highest formal quality are what distinguishes the moll T7.

moll is committed to making solutions that win customers over. Even the professional world takes notice. The moll T7 has won the Red Dot Award: Product Design 2016.
